

Dear Baustista family,

Thank you for your donation and for funding my scholarship. I am truly grateful for your support and what it will do for my future. This scholarship made me feel relieved, because my family could not afford college without this scholarship. I

I am in my senior year, and currently in Model UN and have participated in Cross Country in the past. My Corporate Work Study Program job is working at Loyola UMC Maywood at the Atomic Pathology department in the hospital. I have volunteered most often at St. Procopius for my service hours. I am in the process of applying to many Illinois schools for college, because I want to stay close to home. I have applied for early action for 1 college, University of Dayton. My brother already went to Dayton, and I considered to go there because I heard good things from him. I want to study electrical engineering.

It means a lot for my family to go to college. My grandpa has not been well these past few months, and my parents are worried about him, and considering moving there to take care of him. I have to figure out my future plans for college and I am able to focus on this because the financial burden of paying tuition at CR has been lifted by your generosity. I am working hard to accomplish good grades and get accepted to a good school.

Gracias Familia Bautista for this opportunity!

Best Regards,

Marcoantonio Jimenez
